

Juan Pablo Victoriano Jr

SALESFORCE ADMINISTRATOR | PLATFORM CHANGE MANAGEMENT & OPTIMIZATION

Fair Lawn, NJ | 646-737-4915 | jvictoriano410@gmail.com

Professional Summary

Certified Salesforce Administrator with 10+ years of experience in Salesforce administration, platform optimization, and business process improvement. Skilled in managing a structured enhancement backlog, partnering with cross-functional stakeholders to scope and deliver iterative platform changes, and identifying Agentforce and automation opportunities that reduce manual effort and improve the end-user experience. Proven track record of production support, data quality management, documentation, and user adoption across multi-cloud Salesforce environments.

Professional Experience

LIV Golf | Salesforce Administrator | New York, NY | 01/2026 – Present

- Manage a rolling backlog of custom objects, fields, page layouts, validation rules, and Flow automation, prioritizing enhancements against business impact and stakeholder needs.
- Partner with Sales, Marketing, Operations, and Technology teams to gather requirements, define acceptance criteria, and deliver iterative Salesforce enhancements from intake through testing and release.
- Design and build the Fan Caddie Agentforce AI agent, applying Agentforce topics, actions, and grounding to automate guided workflows and improve the user experience.
- Architected a Flow Orchestration-based Opportunity approval process with native Slack integration and fault-path error handling, reducing manual approval steps and improving process visibility.
- Manage user accounts, profiles, roles, and permission sets, enforcing security and access standards across departments with differing business requirements.
- Build and maintain reports and dashboards that give stakeholders visibility into key performance metrics to support data-driven decisions.
- Maintain Salesforce data quality through validation, cleansing, deduplication, and data-hygiene practices in partnership with business stakeholders.
- Provide day-to-day production support, troubleshooting, user training, and documentation to drive adoption of new and existing platform functionality.
- Use VS Code, Salesforce CLI, and Git to support controlled development, testing, and release practices.

School of Visual Arts | Salesforce System Administrator & IT Project Administrator | New York, NY | 02/2020 – 01/2026

- Served as sole Salesforce System Administrator for six years, administering and optimizing multiple orgs and supporting Salesforce CRM users across various departments and stakeholders, spanning Sales Cloud, Service Cloud, Marketing Cloud, and Education Cloud.
- Managed user provisioning, profiles, roles, permission sets, security settings, and data integrity as part of day-to-day platform administration.
- Designed workflows, approval processes, validation rules, custom objects, and configuration to translate institutional business requirements into scalable platform solutions.
- Led Salesforce EDA enhancements and SIS/LMS integrations to improve student data accuracy, reporting, and operational visibility across departments.
- Managed data migrations, sandbox environments, Change Sets, testing, and controlled releases using Data Loader and related tools.
- Integrated Salesforce with enterprise systems and SaaS applications to improve data management, performance, and cross-system efficiency.
- Delivered user support, troubleshooting, training, documentation, and custom solutions using Apex, SOQL, Visualforce, and Flow.
