Certified Salesforce Administrator | Credential ID 4167614

Experience

Salesforce Administrator

January 2026 – Present

LIV Golf | New York, NY

- Configure and enhance Salesforce by managing custom objects, fields, page layouts, validation rules, and Flow automation; continuously identify opportunities to improve system performance through advanced features
- Administer user accounts, profiles, roles, and permission sets while enforcing security and compliance standards across departments with varying access needs
- Maintain high data quality through validation, cleansing, and deduplication strategies; promote data hygiene best practices with stakeholders during system updates and enhancements
- Develop custom reports and dashboards to track key performance metrics and deliver actionable insights for business decision-making
- Provide technical support and troubleshooting for users across all skill levels; deliver training sessions, workshops, and user documentation to increase platform adoption
- Monitor platform health and performance; coordinate with Salesforce Support and third-party partners to resolve system issues, defects, and outages
- Partner with Sales, Marketing, Operations, and Technology teams to gather requirements, design solutions, and deliver workflow and system enhancements alongside developers and external vendors
- Maintain system documentation and manage change control processes to support audit readiness, release quality, and operational transparency
- Stay current with Salesforce releases and best practices to drive ongoing improvements in system efficiency, user adoption, and data integrity

Salesforce System Administrator & IT Project Administrator

February 2020 – January 2026

School of Visual Arts | New York, NY

- Administered and optimized several Salesforce orgs supporting 200+ users across Service Cloud, Sales Cloud, and Marketing Cloud, ensuring seamless student lifecycle management and operational efficiency
- Led implementation and continuous enhancement of Salesforce EDA, integrating SIS and LMS systems for unified student data and reporting
- Designed and maintained scalable workflows, approval processes, validation rules, and custom objects to meet dynamic institutional requirements and compliance standards
- Planned and implemented the rollout of Chat for support agents in Service Cloud, reducing case resolution time and enhancing student self-service
- Collaborated cross-functionally with Enrollment, Academic Affairs, and Intake teams to implement Data Cloud for unified, real-time student profiles and personalized engagement
- Integrated external ECM to optimize org performance by purging records per retention rules, significantly expanding file and data storage capacity
- Secured data and metadata by syncing Salesforce with a SaaS backup product, scheduling regular backups, and safeguarding customer records
- Managed large-scale data migrations, sandbox management, and deployment using Change Sets, Data Loader, and Import Wizard
- Utilized PowerShell scripting for enterprise server optimization; developed Linux shell scripts and managed Docker containers on web servers

Technical Support Specialist

June 2013 – February 2020

School of Visual Arts | New York, NY

- Provided first-line IT support, resolving network, desktop, and software issues for all users
- Enhanced support efficiency by optimizing processes and documenting knowledge-base articles, resulting in faster issue resolution
- Collaborated with engineers to streamline network and server troubleshooting, enhancing uptime and reliability
- Worked with the desktop support manager to lead enterprise computer rollouts

Education

Bachelor of Professional Studies in Computer Information Systems

Concentration in Web Development & Administration | DeVry College of New York
GPA: 3.58 / 4.0 | Cum Laude
